Art Unit: 1714

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 17-18 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 7-90725 as translated by US Pat. No. 6303095 Nishimura et al..

Nishimura et al. discloses the instantly claimed carbon fiber and method of making at the abstract; column 2, lines 44-62; column 3, lines 5, lines 1-67; column 6, lines 1-2; and the remainder of the document.

4. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 7-90725 as translated by US Pat. No. 6303095 Nishimura et al. in view of US Pat. No. 5552214 Kobomura et al..

Nishimura et al. discloses the instantly claimed carbon fiber and method of making at the abstract; column 2, lines 44-62; column 3, lines 5, lines 1-67; column 6, lines 1-2; and the remainder of the document. It would have been obvious to one of ordinary skill in the art to use the fibers of Nishimura in the

Art Unit: 1714

composites and articles of the instant claims because Kobomura shows the use of such carbon fibers to be well known in such composite articles and the improved properties of the fibers of Nishimura would have been expected in the articles of Kobomura.
